

Autodesk® Green Building Studio®

Advance the Way You Work with Autodesk® Cloud

Autodesk® Cloud enables you to extend your desktop with computing capacity and capabilities, helping you design, visualize, and simulate your ideas to accelerate innovation and gain a competitive advantage.

Users can extend their designs beyond the desktop to perform faster, more accurate energy analysis, optimize energy efficiency, and improve the carbon footprint of multiple design options by accessing the Autodesk® Green Building Studio® service through Autodesk® Cloud.

Key Benefits:

- Make better-informed design decisions and trade-offs earlier in the process, resulting in faster time-to-market and lower project costs.
- Get actionable results within minutes, using local weather and electric grid data.
- Support Building Information Modeling (BIM) processes by gaining better design insight through faster whole-building energy, water, and carbon emission analysis.

Availability

Autodesk Green Building Studio is available to customers with an Autodesk® Subscription to*:

- AutoCAD® Architecture
- AutoCAD® MEP
- AutoCAD® Revit® Architecture Suite

- AutoCAD® Revit® MEP Suite
- Autodesk® Revit® Architecture
- Autodesk® Revit® MEP
- Autodesk® Building Design Suite for Education
- Autodesk® Building Design Suite (Standard, Premium, and Ultimate)
- Autodesk® Design Academy
- Autodesk® Ecotect® Analysis
- Autodesk® Education Master Suite
- Autodesk® Factory Design Suite (Standard, Premium, and Ultimate)
- Autodesk® Infrastructure Design Suite for Education
- Autodesk® Multi-Flex

Getting Started

To start working with Green Building Studio, use your Autodesk ID and password to access the service at <https://gbs.autodesk.com>. If you do not have an Autodesk ID and password, you can create an account by clicking the "Sign In" button in your Autodesk software product.

* The availability of Autodesk Cloud services varies by language and region and may change over time. Please contact your Autodesk reseller or representative for more information. Cloud services are valid for the duration of the customer's Subscription. All Autodesk Cloud benefits are subject to the terms and conditions accompanying the service.
