

Subscription Multi-Year Contracts. Smart. Very smart.

Autodesk® Subscription is a software maintenance and support program that helps you lower the total cost of ownership. A multi-year Subscription contract is a smart business investment—it ensures you stay current with the latest technology at a price that is locked for the length of the contract.

Purchasing any software can be a large financial commitment. And giving your users ongoing access to the latest software releases can be expensive. That's why Autodesk Subscription makes such good business sense. It was designed to help you lower the total cost of ownership, and with a multi-year Subscription contract, you can accurately forecast for the future.

Access to the Latest Technology

To manage your design workflow efficiently and effectively, users need uninterrupted access to the latest Autodesk software. With Autodesk Subscription, you'll enjoy automatic upgrades so your team is always leveraging the latest features and technology. And you'll enjoy exclusive access to Subscription Advantage Packs as they become available. Loaded with new features and specialized functionality, tools, and content, users can download and enjoy the latest Autodesk software enhancements.

Flexible Licensing Rights*

Autodesk Subscription lets users access software in the office, at home, or on the road, and entitles designers to run previous versions of the software (up to three versions back, for most products) concurrently with the latest release so that you can prevent production delays. Plus you can use your Autodesk software licenses outside

of the territory in which you purchased your license (for a limited time).

One-to-One Web Support

Autodesk provides support technicians for answers to software installation, configuration, and troubleshooting questions. You can submit technical questions to product specialists and track and manage your online requests for support to keep downtime to a minimum.

Predictable Budgeting

No one looks forward to the annual budgeting process. Gathering estimates and trying to predict what your business support tools will cost can be difficult and time consuming at best. But with a Subscription multi-year contract, you can lock in your Autodesk® software pricing for the length of your contract. That's especially important if you're affected by foreign exchange currency fluctuations.

You'll also enjoy more effective and efficient contract management because a multi-year Subscription contract can help you lower the cost of procurement. You'll need to issue only one purchase order and process only one invoice, lowering your administrative burden.
